-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 July 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-3 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 25 July 2003 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on March 3, 2004 was considered by the examiner.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the two back wheels defined in lines 1 and 2 of claim 1 must be shown or the features canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate

changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. Note the use of "means" in lines 7, 9, and 11.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitations "the lower portion", "the converging front legs", and "the front end of said footrest" in lines 4, 4-5, and 6 respectively. Claim 2 recites the

limitation "the castoring support" in line 3. There is insufficient antecedent basis for these limitations in the claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Eichhorn US 5,660,435 in view of Smith US 5,299,825.

Eichhorn discloses a foldable pushchair comprising two back wheels 260, 270 and a central front wheel 320. See Figure 1C. The central front wheel 320 is a castoring wheel. See column 6, lines 19-21. A footrest 80 is linked to a lower portion of converging front legs 40, 45 of a frame. See Figures 1A and 2. The castoring wheel 320 is fitted to the front end of said footrest 80 in that assembly 42 is accommodated within body portion 81. See Figure 3A. Also, the footrest comprises means 580, 600 allowing a castoring support 42 supporting the castoring wheel 320 to lock and unlock. See Figures 3A and 3B. Eichhorn does not disclose that the footrest is linked to the front legs by a pin-jointed connection and is provided with means apt to lock the footrest in its position and allow the footrest to fold.

However, Smith teaches the desirability of linking a footrest 15, 34 and wheel 33 assembly to front legs 19 of a pushchair through a pin-jointed connection H" that allows

the footrest to fold and the desirability of providing the footrest with means 35 apt to lock the footrest in its position when in use. See Figures 1, 2, and 4 and column 3, lines 3-8 and 30-33. From the teachings of Smith, linking the footrest of Eichhorn to the front legs by a pin-jointed connection that allows the footrest to fold and providing the footrest with means apt to lock the footrest in its position when in use would have been obvious to one of ordinary skill in the art at the time the invention was made. This would allow for compact storage of the pushchair and sturdy support when in use.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Eichhorn US 5,660,435 in view of Smith US 5,299,825 as applied to claim 1 above, and further in view of Li et al. US 6,315,309.

Eichhorn does not disclose that the castoring wheel is provided with braking means. However, Li et al. teach the desirability of providing a castoring wheel with braking means 90. See Figure 2 and column 4, lines 14-15. From the teachings of Li et al. providing the castoring wheel of Eichhorn with braking means would have been obvious to one of ordinary skill in the art at the time the invention was made. This would give an operator greater control over the motion of the pushchair.

Allowable Subject Matter

Claim 3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The prior art does not disclose a plate fixed to the lower portion of the front legs of a pushchair that is gripped by a footrest locking means. This feature, in combination with the further limitations of the claims, distinguishes the claimed invention over the prior art.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hallam, Fu-Chao, Eichhorn US 5,669,624, Kiser, Espenshade, Lan, Chiu, Lin, and Kreamer disclose pushchairs.
